complexion. It bespeaks your personality. Pimples, blackheads and a putty-like skin are caused by the accumulation of waste products within the skin. A few nightly epplications of a simple cream, composed of one-half ounce of existed carbarate and two heaping tablespoonfuls of pure lard, pro-luces wonderful results on a bad skin. Ox-sted carbarate (which is now sold by most druggists) stimulates the glands of the skin, causing the elimination of waste matter, saving the skin soft and peachy. It has only recently been manufactured in this country, but has been used for centuries by the Turkish women, who are noted for their beautiful complexion.—Advertisement.

Utilities Commission May Order Stops Made on Far Side of F in Rush Hours.

Favorable action probably will be taken by the public utilities commis-sion on the suggestion of the Washington Railway and Electric Company that cars bound for the bureau of engraving and printing be permitted to stop the far, or south, side of F street. This arrangement, it is believed, would relieve congestion on 14th street north- First Diplomatic Dinner at the west, between F and H streets.

The commission has had such a plan under consideration for some time, but probably will not take action upon it until it has completed the survey now being made of traffic conditions on all the street car lines of the city.

the street car lines of the city.

In a letter to the commission yesterday William F. Ham, vice president of the Washington Railway and Electric Company, stated that "while this arrangement will cause some slight inconvenience to passengers transferring at 14th and F streets, it will permit the unloading of a bureau car on the south side of F street at the same time an F street car is unloading and loading on the north side, thereby aiding in the expeditious movement of cars and, in our judgment, greatly relieving the congestion on 14th street, about which considerable complaint has been made.

Could Erect Signposts.

Mr. Ham suggested that the company could erect sign posts on the curb line on both streets, showing that the bureau cars stop on the far, or south, side of F street between the hours of 7 and 9:15 a.m. He pointed out that eighty-four cars are operated over the 14th street tracks between these hours. The periods of greatest travel are between 7:30 and 7:45 o'clock, when nineteen cars are operated, and between 8:45 and 9 o'clock, when zighteen cars are operated.

The commission has received from James G. Montgomery a request that the Washington Railway and Electric Company be required to operate an "owl" car on its H street line to Benning and the District line. and 9:15 a.m. He pointed out that

WOMAN TAKES WILD RIDE ON BACK OF AN ELEPHANT

Her Fall From Frightened Animal Basis of Suit for \$20,000

Damages.

NEW YORK, January 22.—The story of a woman's wild ride on the back of a frightened elephant is related in a suit for \$20,000 damages brought by Mrs. Willie Gee against the New York Zoological Society, under whose care the elephant was kept in Bronx Park. One of the interesting details of the suit is that Mrs. Gee alleges the zoological society used the elephant as a "common carrier" for carrying passengers for pay. She charges that it was the duty of the society to provide her with a safe place to ride on and that the elephant should have been docile.
